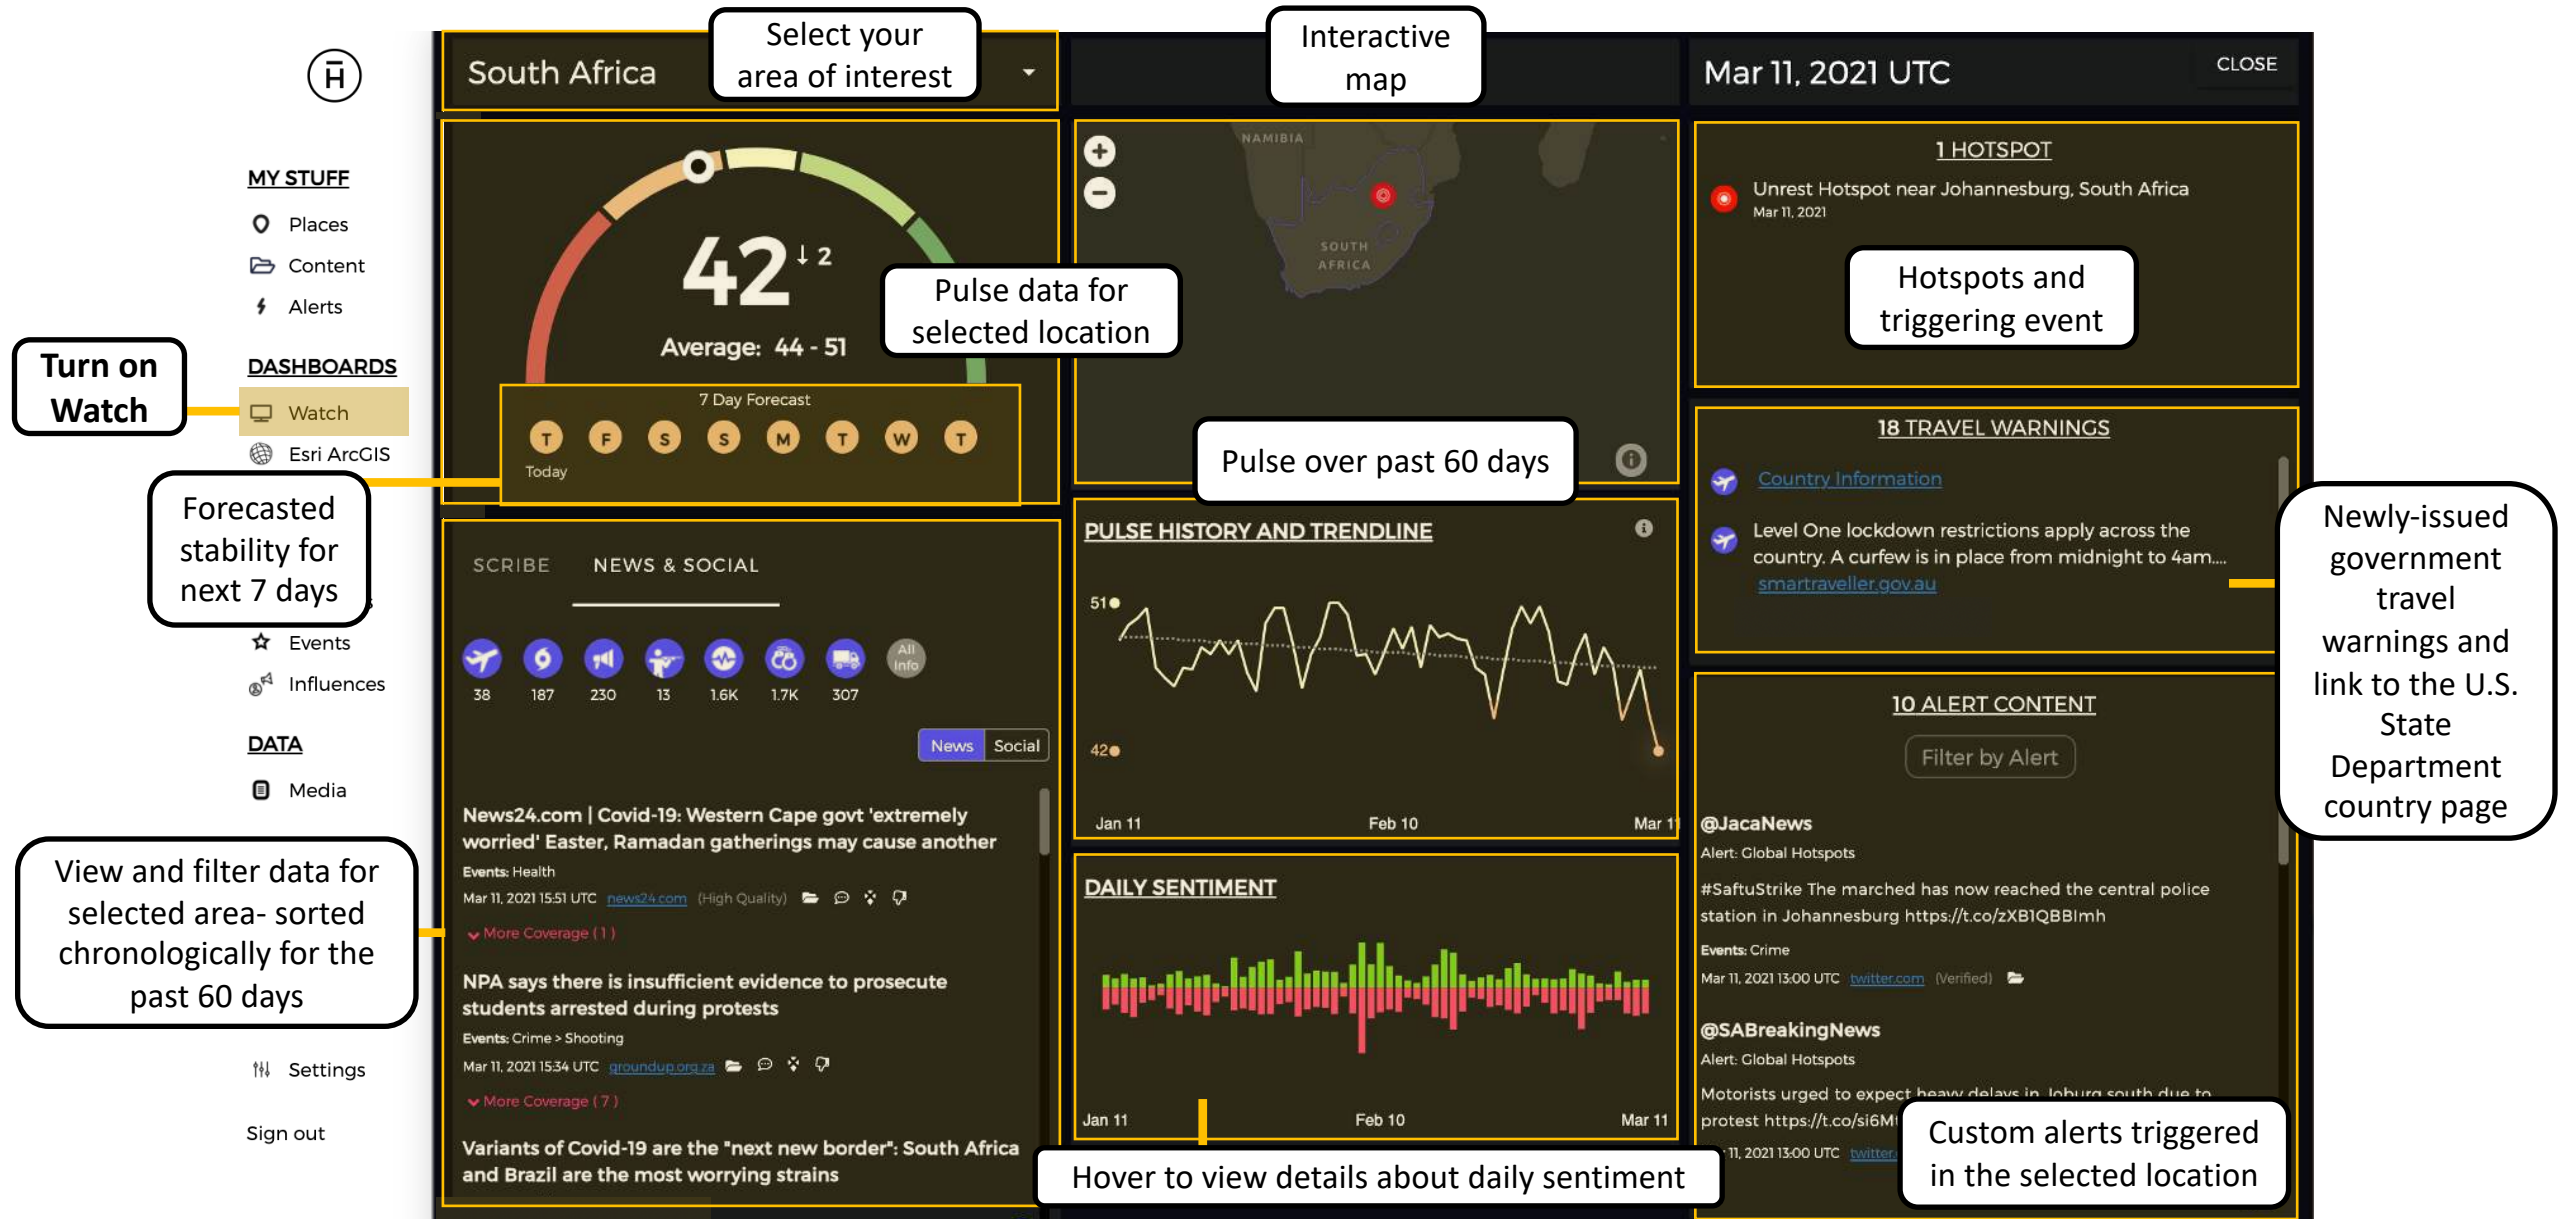
Geospark Analytics

Watch Quick Start Guide

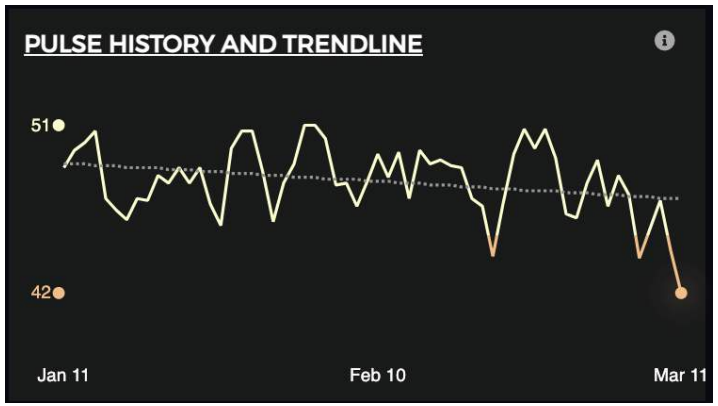
Situational awareness in a single view – for anywhere in the world



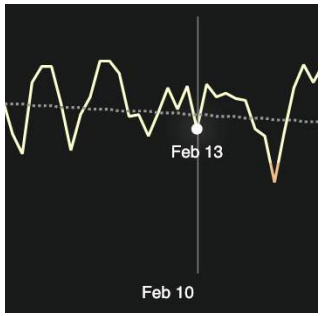
Access Watch & Trendline

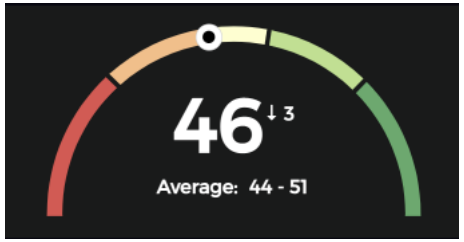
1. Click Watch, or click “Watch This Location” (when Pulse has been turned on) in the Pulse sidebar for a location:

2. In the middle of the watch dashboard, the trendline shows Pulse ratings over the past 60 days:



3. Click on the line to view data from selected day:

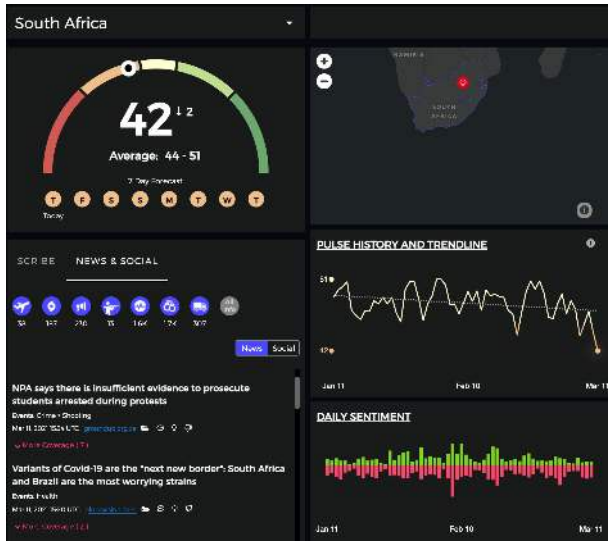




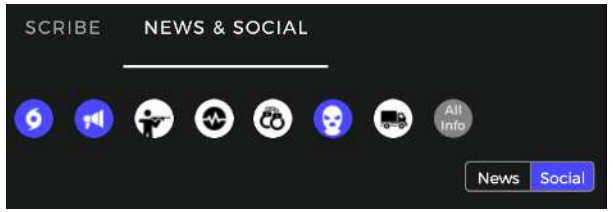
Filtering Data

1. Within Watch, panels will adjust based on the user-selected inputs.

   Sentiment, Alerts, data feed, map, and Pulse update dynamically as options are selected

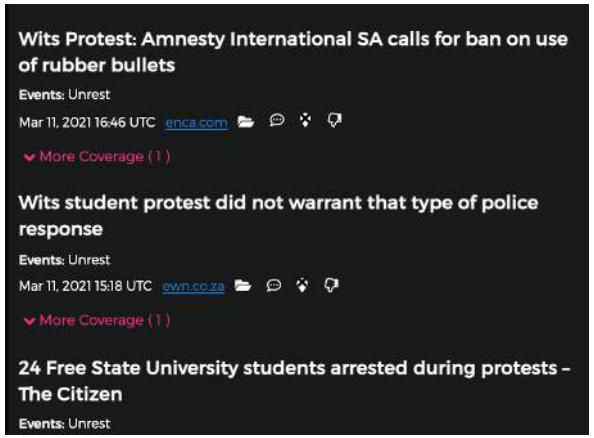


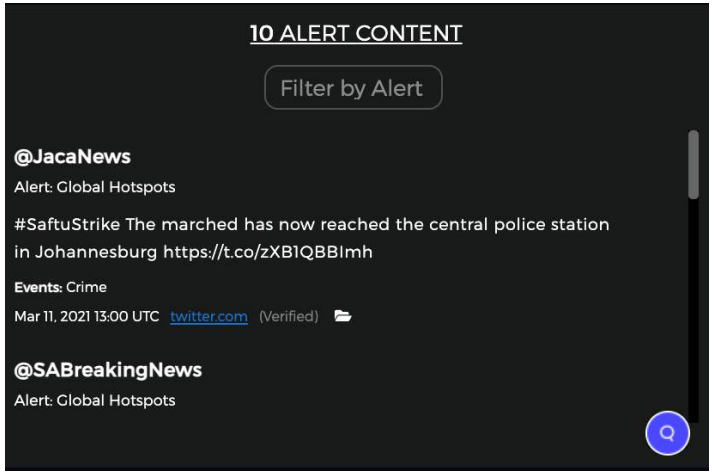
2. Filter data as desired (choose event types, hotspots, or select a day on the trendline)



Monitor Changes

1. Take note of the forecast, current Pulse rating, any custom alerts that have triggered, and the data feed.





2. As new data flows into the system, monitor updates to feeds and Pulse model
